### 3. Add Remote Repo:

- Use the following command to add your Gitea repository as a remote:
- `git remote add gitea <your_gitea_repo_https_url>`

```
@23-22411-061-rgb → ~/gitea_test (main) $ git remote set-url gitea https://shumail_2023bse061:0b45e1cae3e896ca287cf172b1a8559a5a7bd7ef@opulent-goggles-q7576xr9j764fx99q-3000.app.github.dev/shumail_2023bse061/gitea_test.git

## Task 2: Mirror README.md from Gitea to GitHub

### 1. Continue Working with Your Existing Repository:

- You will use the same repository that you created and pushed to your Gitea server in Task 1.

```
Syed@DESKTOP-S50GK51 MINGW64 ~ (main)
$ git clone https://opulent-goggles-q7576xr9j764fx99q-3000.app.github.dev/shumail_2023bse061/gitea_test.git

remote: Counting objects: 100% (3/3), done.
remote: Total 3 (delta 0), reused 0 (delta 0), pack-reused 0 (from 0)
Receiving objects: 100% (3/3), done.
```

## 2. Create GitHub Repository:

- Create a new GitHub repository named assignment 1.

The screenshot shows the GitHub interface for a newly created repository named 'assignment-1'. The repository is public and has 0 stars, 0 forks, and 0 watchers. The page includes a 'Set up GitHub Copilot' section, an 'Add collaborators to this repository' section, and a 'Quick setup' section. The 'Quick setup' section provides instructions for cloning the repository using HTTPS or SSH, and a command-line setup for creating a new repository. The command-line setup includes the following commands:

```
echo "# assignment-1" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/23-22411-061-rgb/assignment-1.git
git push -u origin main
